"A strong cash flow and continued market investments lead to increased market shares and growth once again."

A strong cash flow and continued market investments lead to increased market shares and growth once again!

The quarter

The market was considerably weaker than we had previously assessed. That assessment was made based on a potential interest rate cut and possible future interest rate cuts which would boost sales, however that was not the case. Our current evaluation is that the promo market decreased by **5-10%** depending on the country and that the retail trade continued to experience similar challenges and reductions.

We foresee a temporary weakness in the market and will continue our market investments as opportunity to take market shares. Currently our confirmed orders are also looking better than last year.

Despite these challenges, we were able to achieve a growth of 4%, 3% of the growth was organic and 1% was in currency and acquired business. Such strong performance meant continued building market shares and a net turnover that amounted to SEK 2,397.9 (2,304.5) million, which provided a new "all time high" for a second quarter.

We continue to deliver a strong gross profit margin which amounted to **49.0** (**49.5**) %. However, the operating result declined from SEK **363.9** million to SEK **301.2** million, partially due to overall increased costs and also increased market investments. Cash flow from current operations improved by SEK **107.4** million and amounted to SEK **337.5** (**230.1**) million.

Half the year

In 6 months, we saw a reduction in sales of SEK **46.9** million or **1%**, which in the first half of the year means that we continue to take market shares - although I am far from satisfied with the overall outcome. Operating result decreased by SEK **190.5** million and amounted to SEK **486.8** (**677.3**) million, providing an operating margin of **11.1%**. The decrease in profit is attributable to similar challenges experienced during second quarter. Cash flow from operating activities also improved during the first half of the year and amounted to SEK **541.1** (**37.0**) million.

Rolling 12 months

On a rolling full-year basis, net sales amounted to SEK **9,466.0** million with an operating result of SEK **1,386.6** million, which gave an operating margin of **14.6%**.

Cash flow and balance sheet

As previously stated, we have a strong cash flow which continues to provide us a very strong balance sheet. The equity ratio amounts to **60.2** (**54.9**) %, which supports a very strong position going forward.

Future

I feel confident in saying that I am optimistic about a bright future ahead! In the short term, we likely will see some turbulence with the ongoing war in Ukraine, elections in the USA, the crisis in the Middle East, etc. We have the benefit of our strong market position and balance sheet to give us an advantage in the longer term.

Historically, we have gone through difficult times and have emerged stronger than ever and we will do it again! We will be able to use our brands, our organization, our balance sheet and our experience to continue to take market shares and continue to look at acquisitions for new growth.

We continue to work tirelessly to create a much larger, more profitable and more successful New Wave in the same way as we have always done.

Note 1 - Accounting policies

This report is prepared in accordance with IAS **34** Interim Financial Reporting and the Annual Accounts Act. The interim report for the Parent Company has been prepared according the Annual Accounts Act as well as RFR **2** Reporting for Legal Entities. Applied accounting policies are otherwise consistent with the 2023 Annual Report.

New accounting policies for 2024

New Wave Group is covered by the new OECD's Pillar two model rules, adopted into Swedish law as of January 1, 2024. These rules may result in a Top-up tax for the Group in some jurisdictions, where the effective tax rate according to Pillar two is below a minimum tax rate of **15%**. Management currently evaluates if there are jurisdictions in which Top-up tax may be imposed. The initial assessment is that there is no significant exposure for Top-up tax.

There are no published changes to IFRS and IFRIC to be applied in the future that are expected to have any significant impact on the Group's reporting.

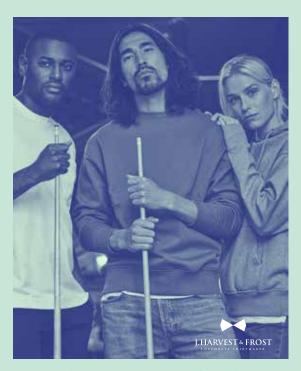

From January 1, 2024 amendments in IAS **1** Presentation of Financial Statements come in to force clarifying when liabilities are to be classified as short-term.

Furthermore there have been minor amendments to IFRS **16** Leases for the requirements for sale and leaseback transactions and new disclosure requirements for supplier finance arrangements in IAS **7** Statement of Cash Flows and IFRS**7** Financial Instruments: Disclosures.

The amendments that will be in force from January 1, 2024 are approved by EU.

Note 2 - Risks and risk control

New Wave Group's international operations mean that it is continuously exposed to various financial risks. The financial risks are interest rate risks, currency, liquidity and credit risks. In order to minimize the effect these risks may have on earnings, the Group has a risk policy. For a more detailed description of the

Group's risk management please refer to the Annual Report 2023, note **16**, p. **98-104**. The Annual Report is available at the Group's headquarters in Gothenburg, Sweden, as well as at www.nwg.se.

The Group's policy is to have short fixed-rate interest periods, which means that fluctuating short-term interest rates have a rapid impact on the Group's net interest income.

Russia's invasion of Ukraine and the war in Gaza has significantly increased geopolitical tensions, which in turn has a major impact on world trade. In this context, New Wave Group has marginal business in these regions. Furthermore, the wars also mean increased uncertainty about economic development.

Group management and each company management closely monitor developments in the conflicts and work closely with suppliers and customers. Strategies and activities are continuously adapted as the situation develops.

Besides the above, the Group's reported risks are deemed to be essentially unchanged.

Definitions of alternative performance measures

Guidelines concerning non-IFRS performance measures for companies with securities listed on a regulated market in the EU have been issued by ESMA (The European Securities and Markets Authority). These guidelines are to be applied to alternative performance measures (APM) applied as of July 3, 2016. The Interim Report refers to a number of non-IFRS performance measures used to assist investors and company management to analyze the company's operations. Because not all companies calculate the financial measures in the same way, these are not always comparable to measures used by other companies. These financial measures should not be seen as a substitute for measures defined under IFRS. A description of the various non-IFRS performance measures used as a complement to the financial information reported according to IFRS and how they are used, is presented below. A reconciliation of alternative performance measures is available on **www.nwg.se/en/investor-relations/ financial-reports/key-numbers.**

| PERFORMANCE MEASURES | DEFINITION/CALCULATION | PURPOSE |
|--|--|---|
| GROSS PROFIT | Net sales less goods for resale. | The measure shows the Group's profitability from the sale of goods. |
| GROSS PROFIT MARGIN | Net sales less goods for resale in percent of net sales. | The measure shows the Group's margins before the impact of, among other things, personnel costs and external costs. |
| OPERATING MARGIN | Operating result as a percentage of the period's net sales. | The measure is used to show operating profitability and how the Group meets its targets. |
| PROFIT MARGIN | Result before tax as a percentage of the period's net sales. | The measure enables the profitability to be compared across locations where corporate taxes differ. |
| NET MARGIN | Result after tax as a percentage of the period's net sales. | The measure is used to show net earnings in relation to income. |
| NET SALES GROWTH | Sales growth including currency effects. | The measure is used to show growth in the Group and to measure how the Group meets its targets. |
| ORGANIC GROWTH | Organic growth refers to sales growth from existing operations cleared from currency effects. The currency effect is calculated by recalculating this year's sales in local currencies to last year's rates and compared to previous year's sales. | The measure is used to show growth in existing business since currency effects are beyond the Group's control and to measure how the Group meets its targets. |
| OPERATING MARGIN BEFORE DEPRECIATIONS | Operating result before depreciation as a percentage of the period's net sales. | The measure is used to show operating profitability and how the Group meets its targets, regardless of depreciation, amortization and write-downs. |
| NET FINANCIAL ITEMS | The total of interest income, interest expenses, currency differences on borrowings and cash equivalents in foreign currencies, other financial income and other financial expenses. | The measure reflects the Group's total costs of the external financing. |
| | | |
| RETURN MEASURES | DEFINITION/CALCULATION | PURPOSE |
| RETURN ON CAPITAL EMPLOYED | Rolling 12 month's result before tax plus financial expenses as a percentage of average capital employed. The average capital employed is calculated by taking the capital employed per period end and the capital employed at year-end for the previous year divided by two. | The measure is used to analyze profitability by putting result in relation to the capital needed to operate the business. |
| RETURN ON EQUITY | Rolling 12 month's result for the period according to the income statement as a percentage of average equity. The average equity is calculated by taking the equity per period end and the equity at year-end for the previous year divided by two. For the Parent company it is calculated as result after tax as a percentage of average adjusted equity. In adjusted equity, the equity part of untaxed reserves is included. | The measure is used to analyze profitability over time, given the resources available to the Parent company's owners. |

| DATA PER SHARE EQUITY PER SHARE | DEFINITION/CALCULATION Equity at the end of the period divided by number of shares at the end of the period. | PURPOSE Equity per share measures the net asset value per share and determines if a company is increasing shareholder value over time. |
|--|--|--|
| CAPITAL MEASURES | DEFINITION/CALCULATION | PURPOSE |
| CAPITAL EMPLOYED | Total assets less provisions and non-interest bearing liabilities, which consist of accounts payable, current tax liabilities, other liabilities and accrued expenses and prepaid income. | The measure indicates how much capital is needed to run the business, regardless of type of financing (borrowed or equity). |
| WORKING CAPITAL | Total current assets, excluding liquid assets and current tax receivables, less short-term non-interest bearing liabilities excluding current tax liabilities. | The measure is used to show how much capital is needed to finance operating activities. |
| NET DEBT | Interest-bearing liabilities (current and non-current) less cash and cash equivalents. | The measure shows financing from borrowings. |
| NET DEBT TO CREDIT INSTITUTES | Interest-bearing liabilities (current and non-current) less lease liabilities and less cash and cash equivalents. | The measure shows financing from borrowings excluding lease liabilities |
| CAPITAL TURNOVER | Rolling 12 month's net sales divided by average total assets. The average total assets is calculated by taking the total assets per period end and the total assets at year-end for the previous year divided by two. | The measure shows how efficiently the Group uses its total capital. |
| INVENTORY TURNOVER | Rolling 12 month's goods for resale in the income statement divided by average inventory. The average inventory is calculated by taking the inventory per period end and the inventory at the same period for the previous year divided by two. | The measure is used to show the inventory's turnover per year, since the stock is central for the Group to keep a good service level, i.e. to be able to deliver goods fast. |
| NET DEBT TO EQUITY RATIO | Net debt as a percentage of equity. | The measure helps show financial risk and is useful for management to monitor the level of the indebtedness. |
| NET DEBT IN RELATION TO WORKING CAPITAL | Net debt divided by working capital. | The measure is used to show how much of the working capital is financed through net debt. |
| INTEREST COVERAGE RATIO | Result before tax plus financial costs divided by financial costs. | The measure is used to calculate the Group's ability to pay interest costs. |
| EQUITY RATIO | Total equity as a percentage of total assets. | The measure shows how much of the Group's assets are financed by the shareholders through equity. An equity ratio is a measure of financial strength and how the Group meets its targets. |
| OTHER MEASURES | DEFINITION/CALCULATION | PURPOSE |

| OTHER MEASURES | DEFINITION/CALCULATION | PURPOSE |
